The screenshot shows the 'Pin Manager' application for the STM32F407VGT6. The interface is divided into several sections:

- Notes:** A section at the top left for user notes.
- IO Status:** A section for monitoring the status of various I/O pins.
- Ref:** A section for reference information.
- Pin Manager:** The main section showing a list of pins and their functions. The pins are organized into a grid with columns for pin number, pin name, and function. The functions listed include GPIO, I2C, SPI, UART, and others.
- Pin Configuration:** A section showing a diagram of the pin connections, including a pin list and a diagram of the pin connections.

The 'Pin Manager' section is currently selected, showing a list of pins and their functions. The pins are organized into a grid with columns for pin number, pin name, and function. The functions listed include GPIO, I2C, SPI, UART, and others.
